EDUCATION

Rajalakshmi Institute Of Technology

Bachelor of Engineering in Computer Science

CGPA: 8.2

Expected May 2028

PROJECTS

AI Powered Drug Repurposing — [Live Demo](#) | *LangChain, LangGraph, TypeScript, LLM, RAG*

- Built a multi-agent AI platform for drug repurposing using LangGraph orchestration and Groq LLM endpoints for analysis synthesis.
- Integrated evidence retrieval across PubChem, ClinicalTrials.gov, Open Targets, openFDA, and patent data sources for grounded decision support.
- Implemented report-grounded chat and retrieval workflows with SSE streaming and RAG components to support iterative analyst queries.

Agentic Interview Copilot — [Live Demo](#) | *Python, FastAPI, CrewAI, LLM APIs, Vector Search*

- Designing an agentic interview assistant that generates role-specific technical questions from job descriptions and skill constraints.
- Building rubric-based response evaluation with criteria-level scoring, feedback reasoning, and structured interviewer summaries.
- Adding retrieval-backed grounding over role context and question banks to improve relevance and reduce hallucinated evaluation outputs.

AI Ad Creative Studio & UGC Video Ads — [Live Demo](#) | *Stable Diffusion XL-SDXL v1.0, LLM*

- Built a full-stack AI ad platform that generates campaign copy with Groq LLM and supports end-to-end creative workflows from brand setup to publish-ready output.
- Developed a canvas-based creative editor using React Konva with draggable text/logo layers, typography controls, and high-resolution export for ad variants.
- Implemented backend auth and profile systems (local + Google OAuth), session management, and social publishing integration paths for multi-platform delivery.

TECHNICAL SKILLS

AI/LLM: LangChain, LangGraph, Groq API, RAG, Prompt Engineering, Chroma, HuggingFace Embeddings.

ML/NLP: scikit-learn, spaCy, Pandas, NumPy, Matplotlib, seaborn.

Backend: Python, FastAPI, Node.js, REST APIs, SSE streaming.

Frontend: React, TypeScript, Vite, Tailwind CSS.

Databases & Tools: MongoDB, Pinecone, Git, Docker, GitHub Actions, Postman, Linux/Unix, Render, Vercel.

ACHIEVEMENTS

- Winner of Blueprints 2026 organized by Google Developer Student Community.
- Ranked 1st among 400+ teams in Smart India Hackathon (SIH 2025 Internal).
- Winner of XCODERS (Zorpix) and Reverse Coding competitions.
- Solved 100+ problems across LeetCode, HackerRank, and GeeksforGeeks.

ADDITIONAL

- **Languages:** English, Tamil.
- **Interests:** Agentic AI systems, LLM applications, NLP, Machine Learning, and Problem Solving.
